CAREER OBJECTIVE:

Detail-oriented QA/QC Engineer with 5+ years of experience ensuring quality compliance on major infrastructure and power plant projects in the UAE and Pakistan. Skilled in inspections, ITP implementation, and resolving non-conformities. Committed to maintaining high standards of safety, quality, and regulatory compliance across all phases of construction.

PERSONAL DETAILS:

Passport No : AR8171341
Languages: English, Urdu, Pashto, Hindi, Arabic (basic)

Work Experience:

• QA/QC Engineer | Multiline Technical Company

Sep 2024 - Present

Project: Taweelah-B Decoupling, Taweelah Power Plant, Abu Dhabi

Client: TAPCO

- Developed and implemented quality control procedures and inspection plans.
- Conducted material inspections and ensured compliance with approved submittals.
- Coordinated with site teams to rectify non-conformances and close NCRs.
- Verified that construction activities aligned with project specifications and standards.
- Maintained comprehensive quality documentation and inspection records.
- Participated in internal and external audits and ensured timely corrective actions.
- Monitored and evaluated workmanship during construction and finishing phases.

QA/QC Engineer | Multiline Technical Company

Jan 2022 - Aug 2024

Project: Renovation of Umm Al Nar Power Plant, Abu Dhabi

Client: ITM & OM Co. Ltd.

- Reviewed and approved QA/QC documentation and method statements.
- Conducted site inspections to ensure conformity to specifications and standards.
- Reported non-compliance issues and ensured corrective and preventive measures.
- Verified materials and workmanship against project quality requirements.
- Coordinated with clients and consultants for inspections and approvals.
- Maintained material test certificates, calibration records, and inspection logs.

QA/QC Engineer | Frontier Works Organization (FWO)

Dec 2020 - Dec 2021

Project: DHA PSC Phase 1, Sector A - KPK, Pakistan

- Performed inspection of incoming materials, construction works, and testing procedures.
- Ensured compliance with design specifications, codes, and project standards.
- Reviewed QA/QC documentation including ITPs, checklists, and method statements.
- Collaborated with engineering and construction teams for quality-related issues.
- Assisted in preparation of final quality dossiers and as-built documentation.
- Identified quality risks and recommended process improvements.
